

Customer Journey Map

Electric Vehicle Charge & Range Analysis

Customer Journey Map

Mapping the journey of an EV buyer / user / analyst using the EV Charge & Range Analysis dashboard and insights.

STAGES What is happening?	 1. AWARE Becomes aware of EV charge & range insights	 2. ACCESS Accesses the dashboard or platform	 3. EXPLORE Explores charge & range data	 4. ANALYZE Analyzes charge time, range & trends	 5. INSIGHTS Generates insights and identifies key findings	 6. DECIDE Makes data-driven decisions	 7. ACT Takes action for better EV planning/use	 8. REVIEW Reviews results and monitors continuously
STEPS What does the person do at this stage?	- Realizes the need to analyze EV charge and range - Looks for reliable information	- Logs in to the EV analytics dashboard - Views available datasets	- Selects filters (vehicle, model, battery, region) - Views summary statistics	- Analyzes charge time and cost - Compares range across models	- Identifies high/low range vehicles - Discovers charging patterns	- Interprets insights for better decisions - Plans optimal EV usage	- Plans trips based on range & charging availability - Chooses the best EV option	- Monitors performance over time - Reviews updated data & trends
INTERACTIONS Who interacts & how much? P: Primary (High) S: Secondary (Med) T: Tertiary (Low)	- P: Friends / Family - S: EV Forums - T: Social Media	- P: Web/App Dashboard - S: Account - T: Help / Support	- P: Filters & Dashboard - S: Charts & Maps - T: Tooltips	- P: Data Tables - S: Visualizations - T: Calculations	- P: Analytics Engine - S: Metrics - T: AI / ML Models	- P: User - S: Reports - T: Export	- P: User - S: EV Platform - T: Navigation App	- P: Dashboard Updates - S: Alerts - T: Notifications
GOALS & MOTIVATIONS What is the person trying to achieve?	- Understand EV charge & range importance - Find trustworthy insights	- Access accurate and up-to-date data - Save time	- Get a quick overview - Explore important metrics	- Understand charge time & range factors - Identify patterns and trends	- Find high-range EVs - Generate actionable insights	- Make informed decisions - Reduce cost & charging time	- Optimize EV usage and trips - Improve efficiency and savings	- Track impact - Continuously improve planning
PAIN POINTS What is stopping / frustrating or pain points do they experience?	- Too much scattered information - Hard to know where to start	- Login issues - Unfamiliar dashboard	- Too many filters - Confusing visuals	- Complex data - Takes time to compare	- Unclear patterns - Not sure if insights are accurate	- Need more context - Unsure about best action	- Charging availability issues - Limited resources	- Inconsistent data updates - Hard to measure impact
EMOTIONS What is the person feeling?	Curious Interested	Hopeful Cautious	Engaged Inquisitive	Focused Challenged	Satisfied Excited	Confident Responsible	Motivated Active	Satisfied Relieved
OPPORTUNITIES How might we improve the experience?	- Awareness campaigns - Easy onboarding	- Simplified login - Quick tour of dashboard	- Smart filters - Default views for quick start	- Guided analysis - Easy comparison tools	- Clear risk indicators - Automated insights	- Actionable recommendations - Download reports	- Real-time charging info & alerts - Route optimization	- Real-time data updates - Impact tracking
